

SHINESHERAY MYEZA

IT SYSTEMS ENGINEER

+27 64 9696 188 | shinesheray@gmail.com | Krugersdorp, South Africa

PROFESSIONAL SUMMARY

Results-driven IT Systems Engineer with proven experience improving system reliability, reducing operational costs, and increasing user productivity through automation, secure infrastructure design, and proactive support. Strong background across Microsoft 365, cloud identity, endpoint management, networking, and application support. Known for translating technical solutions into measurable business value by reducing downtime, improving compliance readiness, and streamlining IT operations.

WORK EXPERIENCE

IT Systems Administrator | LuckyBeard

Oct 2025 – present

- Optimised Microsoft 365, Atlassian, Google Workspace, and Dropbox environments to improve system uptime, collaboration efficiency, and end-user productivity across the business.
- Implemented and managed Kandji MDM/EDR for macOS devices, reducing security risk, improving compliance visibility, and accelerating device provisioning and onboarding.
- Delivered Level 2–3 IT support via Jira Service Management, resolving escalated incidents faster and minimising employee downtime.
- Strengthened organisational security posture by aligning IT controls with GDPR, POPIA, and ISO 27001 standards, supporting audit readiness and risk reduction.
- Reduced operational inefficiencies by creating accurate infrastructure documentation, asset registers, and lifecycle tracking through Confluence.
- Supported and maintained network infrastructure (MikroTik routers, VPNs), ensuring stable connectivity and minimal service disruption.
- Automated repetitive IT workflows using scripts and integrations, saving support hours and improving response consistency.

IT Support Engineer / Full Stack Engineer | NiceNetwork Solutions Oct 2023 – Sept 2025

- Supported and maintained client infrastructure and applications, contributing to reliable service delivery and improved customer satisfaction.
- Designed and deployed automation scripts and internal dashboards using JavaScript, Node.js, and SQL, reducing manual reporting and operational overhead.
- Assisted with server provisioning, configuration, and security hardening, improving system performance and reducing vulnerability exposure.
- Delivered hands-on support for TCP/IP, VLANs, VPNs, and hosting environments, ensuring stable and secure client networks.
- Collaborated with cross-functional IT and development teams to deliver scalable technical solutions aligned with client business requirements.

Application Support Specialist | Jurumani Solutions

June 2022 – Oct 2023

- Provided Tier 1–2 application and IT support, consistently meeting SLA targets and reducing recurring incidents.
- Installed, upgraded, and configured enterprise software and endpoint devices, ensuring smooth production operations.
- Administered Windows Server, Active Directory, and Office 365 environments, improving user access control and system stability.
- Worked closely with development and QA teams on system integrations and release deployments, reducing post-release issues.
- Created user documentation and delivered training sessions, lowering support demand and improving user adoption.

Account Executive | DDB

April 2018 – May 2022

- Managed key client accounts and contributed to revenue retention through effective campaign delivery and client relationship management.
- Coordinated cross-functional teams to deliver integrated marketing campaigns on time and within scope.
- Analysed campaign performance and presented insights to clients, supporting data-driven decision-making.

EDUCATION

- Full Stack Software Engineer/Database Admin | HyperionDev |
- Digital Brand Strategy | VegaSchool College |
- CompTIA A+
- CompTIA Network +

TECHNICAL SKILLS

- **Infrastructure & Systems:** Windows Server, Active Directory, Intune, Azure AD, Microsoft Office 365 Admin center, Google Workspace, Kandji (MDM), Jira, Confluence, OneLogin, Atlassian Suite
- **Networking:** TCP/IP, VLAN, VPNs, Switch Configuration, DHCP, Endpoint Management
- **Security & Compliance:** ISO 27001, GDPR, POPIA, DPIA, Device Encryption, Access Control
- **Cloud & Automation:** Microsoft 365 Admin, Azure Portal, PowerShell, Workflow Automation
- **Scripting & Tools:** Node.js, JavaScript, SQL, React, MongoDB, Git, API Integration
